Dear Mr. Kerr:

As a followup to our meeting on March 20, 1995, the Environmental Protection Agency (EPA) will keep you informed as to the status of any cleanup actions that will be taken with respect to the former Carter Carburetor facility.

As you are aware there is polychlorinated biphenyl (PCB) contamination located in the building you own. Enclosed is a copy of the May 31, 1994, letter we sent to Mr. George Moore, which explains the threats associated with PCB contamination and a telephone number you can call if you want more information.

If you have any questions, please call me at (913) 551-5028.

Sincerely,

A handwritten signature in dark ink, appearing to read "Donald F. Hamer", is written over the typed name.
